Face of the future: a new era of iconic design at Mercedes-Benz starts with all-new electric GLC

- Mercedes-Benz reinterprets one of the most iconic design elements in automotive history
- Reimagined iconic grille features a chromed frame, a smoked-glass-look lattice structure and integrated contour lighting
- With striking elements, the design philosophy of Sensual Purity enters the next phase
- The all-new electric GLC is the first Mercedes-Benz to showcase this elevated design language

Stuttgart. Inspired by rich heritage and designed for the future, Mercedes-Benz is elevating the design language of Sensual Purity. The first series production vehicle to showcase this is the all-new Mercedes-Benz GLC with EQ Technology. One of the most defining characteristics is the new iconic grille. This striking centrepiece preserves the essence of Mercedes-Benz while embracing a more modern touch through reduction, clean lines and cutting-edge technology. The all-new electric Mercedes-Benz GLC will celebrate its world premiere at the IAA Mobility show in Munich on 7 September 2025.

A new era of iconic design, redefining the brand's face

For over 100 years, the chrome grille has been a central feature of nearly every Mercedes-Benz, while steadily evolving over time. From its original vertical proportions with simple details to the more intricate, horizontal architecture of recent years, the grille has been a proud signature on many millions of cars. The heritage portfolio features many memorable and much-loved examples, including the legendary Mercedes-Benz 600 Pullman (W 100, 1963-1981), the "Strich 8" (W 114, 1968-1973), and the Mercedes-Benz S-Class model series W 108 (1965-1972) and W 111 (1959-1968).

The chrome grille is one of the most visual representations of the brand's DNA. See a Mercedes-Benz grille, and there is no doubt as to the provenance of the vehicle it's carried on. Therefore, the introduction of the iconic grille marks an important step for the company that has created many milestone moments. From a functional feature of the combustion-vehicle era, the new grille of the all-electric GLC has transitioned into an illuminated work of art, conveying prestige and status through reduction, clean lines and technology. The fusion of design, technology and craftsmanship is boldly transposed through three main features: a wide chromed frame, a smoked-glass-effect lattice structure and integrated contour lighting. An illuminated version is available as an option, featuring a total of 942 dots backlit from behind. This optional high-tech pixel graphic can even be animated and brings the electric GLC to life. Additionally, the central star and the integrated surrounding contour of the panel are illuminated.

“Our new iconic grille is not just a new front for the GLC, it redefines the face of our brand. It is the perfect fusion of lasting design codes reinterpreted for the future, making our cars instantly recognizable.”

Gorden Wagener, Chief Design Officer, Mercedes-Benz Group AG

The evolution of Sensual Purity – developing a timeless automotive identity

Few brands have the same level of worldwide trust, love and respect as Mercedes-Benz. Vehicles bearing the three-pointed star have always been synonymous with subtle elegance, sophistication, innovation and prestige – each one creating a strong visual identity shaped by the design philosophy of Sensual Purity. The new GLC takes these ideas to a whole new and exciting era. For many years, GLC has been the most popular model from Mercedes-Benz topping the charts as the brand’s best-selling series. And it remains the best-seller.

The new GLC with EQ Technology marks a turning point in the midsize segment for Mercedes-Benz as the first model in a completely new family of vehicles featuring MB.OS – the superbrain powering every new Mercedes-Benz – and leading the way with an elevated design language. The GLC offers customers a vehicle that seamlessly combines the reliability and elegance of Mercedes-Benz with cutting-edge electric drive systems and intelligent, intuitive software. Designed to adapt effortlessly to diverse needs and lifestyles, it continues the GLC legacy in electric form – iconic, versatile, intuitive and smooth.

And the design revolution continues on the inside. Stepping into the all-new GLC evokes a unique feeling synonymous with Mercedes-Benz - a feeling of comfort, safety and being supported. An all-new, seamless MBUX HYPERSCREEN elevates the inside of the new GLC in a way never seen before. It offers a sense of belonging, encapsulating the ‘Welcome Home’ feeling that just sitting in a Mercedes-Benz can bring. Every drive feels familiar and intuitive, ensuring that the electric GLC is not just a vehicle, but a welcoming space that seamlessly integrates into the lives of its drivers.

Mercedes-Benz AG at a glance

Mercedes-Benz AG is part of the Mercedes-Benz Group AG with a total of around 175,000 employees worldwide and is responsible for the global business of Mercedes-Benz Cars and Mercedes-Benz Vans. Ola Källenius is Chairman of the Board of Management of Mercedes-Benz AG. The company focuses on the development, production and sales of passenger cars, vans and vehicle-related services. Furthermore, the company aspires to be the leader in the fields of electric mobility and vehicle software. The product portfolio comprises the Mercedes-Benz brand with Mercedes-AMG, Mercedes-Maybach and G-Class with their all-electric models as well as products of the smart brand. Mercedes-Benz AG is one of the world's largest manufacturers of high-end passenger cars. In 2024 it sold around 2,4 million passenger cars and vans. In its two business segments, Mercedes-Benz AG is continually expanding its worldwide production network with more than 30 production sites on four continents, while gearing itself to meet the requirements of electric mobility. At the same time, the company is constructing and extending its global battery production network on three continents. As sustainability is the guiding principle of the Mercedes-Benz strategy and for the company itself, this means creating lasting value for all stakeholders: for customers, employees, investors, business partners and society as a whole. The basis for this is the sustainable business strategy of the Mercedes-Benz Group. The company thus takes responsibility for the economic, ecological and social effects of its business activities and looks at the entire value chain.
