21 October 2025

The all-new electric GLC available to order: the electrified bestseller is here

- Sales release for Germany starts on 29 October 2025 with a list price starting at 71,281 euros¹
- As of today, the GLC is already available to configure online and in parallel ready to order in nearly all European markets
- Attractive German leasing and financing conditions, such as monthly leasing rates starting at 475 euros² for private customers
- Electric model is priced comparable to combustion engine model
- Four more electric models will follow, two of them with market introductions later in 2026
- The electrified bestseller: the all-new electric GLC combines a striking new design with its iconic grille and a “Welcome Home” feeling, while upholding the GLC’s legacy of benchmark versatility
- The powerful GLC 400 4MATIC with 360 kW has an electric range of up to 715 kilometres³ and a recharged range of up to 303 kilometres in only ten minutes⁴– thanks to 800-volt technology and best-in class efficiency with a possible top value of 14,9 kWh/km⁴

Stuttgart. Completely new, yet familiar – the all-new electric GLC (energy consumption combined: 18,9 – 14,9 kWh/100 km | CO₂ emissions combined: 0 g/km | CO₂ class: A)³ is the first Mercedes-Benz to feature elevated design, including the redesigned, brand-defining illuminated and animated chromed grille. More than just a striking design element, this iconic grille redefines the face of the brand, exuding prestige and self-confidence. This sets the tone for the electric GLC’s core promise: a ‘Welcome Home’ feeling of comfort and safety, paired with an intuitive digital experience. Shaped by extensive customer feedback – purposeful, refined and unmistakably a GLC – it enhances everything customers adore including a high-quality interior. Built electric-only, it complements its best-selling sibling. It excels in performance, range, efficiency and charging speed while setting new standards in design, value, versatility and space in its class. Combining reliability and the elegance of Mercedes-Benz with cutting-edge electric-drive systems and intelligent, intuitive software the GLC continues legacy in electric form – iconic, versatile, intuitive and smooth.

¹ The price quoted is the gross list price in Germany including 19% VAT, plus delivery costs or costs for collection from the factory.

² For the GLC 400 4MATIC with EQ Technology with a 20% with special leasing payment, 36-month term, and 45,000 km total mileage.

³ The specified values were determined in accordance with the WLTP (Worldwide harmonised Light vehicles Test Procedure) measurement method. The ranges given refer to ECE markets. The energy consumption and CO₂ emissions of a car depend not only on the efficient utilisation of the fuel or energy source by the car, but also on the driving style and other non-technical factors.

⁴ The quoted range (WLTP) achievable after a 10-minute charge was obtained using the maximum DC charging capacity as per ISO/SAE 12906, under the conditions specified in that standard.

“The GLC has been Mercedes-Benz's most popular model and the segment leader worldwide for years. With the all-new electric GLC, we aim to continue that success. This vehicle combines everyday practicality, long range, and iconic design, and more than ever conveys our brand promise of “Welcome Home.”

Mercedes-Benz has listened to customer feedback around the world and delivered an all-electric model that marks a turning point in the mid-size segment. We are committed to making electric mobility accessible, offering the all-electric GLC with a comparable price to the combustion engine models.”

Mathias Geisen, Member of the Board of Management, Mercedes-Benz Group AG,
responsible for Sales and Marketing

Competitive prices makes switching to electric mobility even easier

As of today, German customers can configure their desired GLC in the configurator, including prices and a payment calculator. Orders of the powerful 360-kW GLC 400 4MATIC with EQ Technology (energy consumption combined: 18,9 – 14,9kWh/100 km | CO₂ emissions combined: 0 g/km | CO₂ class: A)³ can be placed online and at Mercedes-Benz partners starting on 29 October 2025. The list price starts at 71,281 euros¹. With this offer, Mercedes-Benz is providing its customers with a compelling argument to switch to electric mobility. Both attractive leasing and financing options will be available for the all-new electric GLC model, such as a monthly leasing rate of 475 euros² for private customers. Four more electric models will follow; two of them later in 2026.

More space than ever before enhances passenger comfort and luggage capacity

The all-new GLC is the epitome of versatility, spaciousness and comfort, making it the perfect companion for everyday adventures. Seamlessly building on the proven qualities of the popular model series, the electric GLC takes things up a notch. With a wheelbase that's 84 mm longer compared to the combustion GLC, passengers can enjoy an exceptionally roomy and comfortable ride. The result is 13 mm more legroom and 46 mm more headroom up front, while rear passengers benefit from 47 mm more legroom and 17 mm more headroom. For those requiring ample storage space, the GLC has it covered. The boot provides a generous 570 litres of capacity and, when the rear seats are folded down, it expands to an impressive 1,740 litres. Additionally, the frunk (front trunk) contributes an extra 128 litres of load capacity and can be opened partially electrically via touch control. In addition to this, it boasts an impressive towing capacity of up to 2.4 tonnes. Whether preparing for a weekend getaway or a substantial shopping trip, the new GLC accommodates all needs.

The perfect blend for a smooth journey: comfort, agility, safety and easy charging

Experience supreme ride comfort and exceptional agility in the all-new electric GLC, thanks to its intelligent air suspension AIRMATIC and 4.5-degree rear-axle steering. The all-new electric GLC models in Europe come as standard with extensive safety equipment and the Distance Assist DISTRONIC. Depending on equipment and market, technical details include up to ten cameras, five radar sensors, twelve ultrasonic sensors and a water-cooled high-performance computer with sufficient power reserves for future functions and regular over-the-air updates. Mercedes-Benz bundles additional comfort assistance functions⁵ under the name MB.DRIVE. Completing the perfect journey is a seamless and intuitive charging experience, highlighted by integrated reservation function for charging stations⁶ as part of the MB.CHARGE Public⁷⁸ service – an industry-first innovation from Mercedes-Benz.

⁵ Our driver assistance and safety systems are aids and do not relieve you of your responsibility as the driver. Please take note of the information in the Owner's Manual and the system limits which are described therein.

⁶ Currently, the reservation function is available at selected Mercedes-Benz charging stations in Germany and the US. Further rollouts are planned for 2025, with the long-term goal of establishing around 10,000 charging points by the end of the decade. Mercedes-Benz is initially offering the reservation option free of charge as part of MB.CHARGE Public. Mercedes-Benz reserves the right to make reservation chargeable in future.

⁷ In order to use the MB.CHARGE Public digital extra, the customer will require their own separate charging contract with a selected third-party provider.

⁸ A personal Mercedes me ID and agreement to the Terms of Use for the Mercedes-Benz Digital Extras are required to use the services. In addition, the vehicle must be paired with the corresponding user account. Upon expiry of the initial term, the services can be renewed for a fee, provided they are at that point still offered for the corresponding vehicle.

Unlocking an expansive new spatial and digital experience

The all-new seamless MBUX HYPERSCREEN greets the customers as they step in the electric GLC. At 99.3 centimetres (39.1 inches), it is the largest screen in a Mercedes-Benz, creating an immersive spatial experience with digital elegance. The warm and inviting ambient light, combined with the starry SKY CONTROL panoramic roof featuring switchable segments, elevates the unique Mercedes-Benz 'Welcome Home' feeling to a new level.

Customers can choose from a variety of atmospheric display styles as background motifs. The instrument cluster, control elements, and ambient lighting colours go along with the selected emotional motif. This allows users to create a personal atmosphere in the vehicle where physical and digital worlds blend seamlessly thanks to the Mercedes-Benz Operating System (MB.OS).

High-quality materials ensure first-class haptics and elegance – including animal-free options. Here, Mercedes-Benz sets a new standard in the use of vegan materials with the optional Vegan Package. This sumptuous suite of interior soft-touch materials is certified by The Vegan Society Society (further information [here](#)). It makes Mercedes-Benz the first car manufacturer worldwide to offer an independently certified vegan interior. [More information.](#)

Generously Equipped as Standard and attractive packages

The all-new electric GLC boasts exceptional standard equipment. For those who want even more features, there are three equipment packages to choose from, each building on the last.

A wide range of customisation options for more sportiness and exclusivity

The highly popular AMG Line is available as an option. Exterior features include 20-inch light alloy wheels, a front bumper with air intakes and a chrome splitter as well as a special rear bumper. When the door is opened, drivers are greeted with an animated light show on the ground featuring a star pattern. The interior of AMG Line vehicles features sporty accents such as a sports leather steering wheel with a flattened rim and an AMG sports pedal set in brushed stainless steel with black rubber pads.

For customers who prefer even more sportiness, the AMG Line Plus is available. It adds additional design elements from the AMG Performance Programme to the AMG Line. These include a high-gloss black rear spoiler, illuminated high-gloss black door sills and exclusive 21-inch alloy wheels. Red MANUFAKTUR seat belts and the Night Package complete the AMG Line Plus.

For even more exclusive accents, the AMG Line Sport Seat Package and the Night Package are available in conjunction with the AMG Line. The expressive Night Package includes high-gloss black trim elements on the bumpers, side skirts and beltline, a high-gloss black upper casing on the exterior mirrors and tinted rear windows. The package also includes 20-inch alloy wheels.

Mercedes-Benz AG at a glance

Mercedes-Benz AG is part of the Mercedes-Benz Group AG with a total of around 175,000 employees worldwide and is responsible for the global business of Mercedes-Benz Cars and Mercedes-Benz Vans. Ola Källenius is Chairman of the Board of Management of Mercedes-Benz AG. The company focuses on the development, production and sales of passenger cars, vans and vehicle-related services. Furthermore, the company aspires to be the leader in the fields of electric mobility and vehicle software. The product portfolio comprises the Mercedes-Benz brand with Mercedes-AMG, Mercedes-Maybach and G-Class with their all-electric models as well as products of the smart brand. Mercedes-Benz AG is one of the world's largest manufacturers of high-end passenger cars. In 2024 it sold around 2,4 million passenger cars and vans. In its two business segments, Mercedes-Benz AG is continually expanding its worldwide production network with more than 30 production sites on four continents, while gearing itself to meet the requirements of electric mobility. At the same time, the company is constructing and extending its global battery production network on three continents. As sustainability is the guiding principle of the Mercedes-Benz strategy and for the company itself, this means creating lasting value for all stakeholders: for customers, employees, investors, business partners and society as a whole. The basis for this is the sustainable business strategy of the Mercedes-Benz Group. The company thus takes responsibility for the economic, ecological and social effects of its business activities and looks at the entire value chain.
