

HOLA!

SEAT unveils the new Ibiza and Arona: refreshed design, upgraded interiors, and even greater value

- The updated exterior designs of both models offer a new look with youthful and dynamic character
- Inside the cabin, quality steps up with a more refined interior
- More value than ever: a choice of efficient TSI engines, enhanced standard equipment, and advanced safety features

Martorell, 29/10/2025 – Marking its 75th anniversary, SEAT is entering an exciting new chapter by refreshing two of its most popular models – the Ibiza and the Arona. These updates not only celebrate the brand’s heritage but also reinforce its commitment to accessible mobility.

The new SEAT Ibiza and Arona keep raising the bar in their segments with vibrant design and advanced technology. Both vehicles take a new step forward, driven by three key pillars: a **refreshed exterior**, a **refined interior** and a **stronger overall value proposition**.

“The SEAT Ibiza and Arona are true success stories, fundamental to our line-up and the brand’s growth. As two of the SEAT’s most iconic models, they have played a key role in driving urban mobility and empowering people to move freely toward new possibilities.” said Markus Haupt, CEO of SEAT. “With refreshed exterior and enhanced interior, we’re boosting their value and appeal even further. At the same time, we’re preparing both models for the future, with upcoming EU7 compliance and the introduction of mild-hybrid powertrains.”

The SEAT Ibiza is a true icon in its segment. Since its debut in 1984, it has sold over 6 million units across five generations—constantly evolving, embracing fresh ideas, and inspiring a youthful, creative, and forward-thinking spirit.

The SEAT Arona urban SUV, has built a strong following since its launch in 2017. With over 750,000 units sold, it continues to deliver for drivers seeking an energetic, youthful SUV ready to take on every urban challenge.

REFRESHED EXTERIOR

The new SEAT Ibiza and Arona bring a **more characterful design** that reflects the evolving needs of today’s drivers. Both models now feature **updated styling, vibrant new colours**, and a **completely renewed range of alloy wheels**— available in sizes from 15” to 18”.

The design evolution brings a new and more confident look, as the front of both cars is completely renewed. The **new hexagonal grille design** combined with the **iconic diamond-shaped mesh** in a matt/polished finish, enhances the sporty character and emphasizes the wider proportions. The **new, slimmer Full LED headlights** emphasize the car width while redefining the front-end expression. Their **refined light signature** not only adds a more technical look and gives the cars

a more determined attitude but also **improves visibility** with **greater beam range** and **brightness**, all while using less energy.

The design language of the **new front bumper** enhances the expressive design, and sculpture. At the same time, all the technical components such as sensors and fog lights are framed in the black areas, allowing for greater expressive freedom in the front surfaces.

These updates flow seamlessly into the perfectly proportioned side profile, reinforcing its dynamic stance on the road.

At the **rear**, the new **SEAT Ibiza** introduces a **newly designed bumper** underscoring its sporty, youthful attitude. The horizontal highlight at the top has been extended creating a wider look. **Dark aluminium model lettering** – whether it is Ibiza or Arona – adds a modern, distinctive finishing touch.

In FR trim levels, the **laser-etched FR logo** on the **B-pillar** adds a subtle yet sporty edge. The athletic proportions are further underlined by a new range of alloy wheels featuring more efficient tyre technology—improving both dynamism and efficiency. The line-up includes **new alloy wheel designs** for each model: the Ibiza adds two 17” and two 18” options, while the Arona gains two 16” and two 18” options. Offered both in painted or machined finishes, these join the existing range [15” to 18”] to deliver greater visual impact and customisation.

Finally, both the Ibiza and Arona’s **exterior palettes** are **refreshed** with more vibrant and youthful colours. **Liminal**, **Oniric**, and **Hypnotic** join the existing range, adding new energy and personality to the line-up.

The rise of generative AI has created a surreal aesthetic of bold geometries, unexpected compositions, and vivid colours. Defined by the tension between artificiality and photorealism, these visuals inhabit a liminal space between realism and imagination. For SEAT, this language aligns with its vibrant, dynamic, and expressive identity. By embracing chromatic palettes, AI-inspired environments, and hyper-embossed geometries in trims, SEAT can capture the cultural moment while reinforcing its youthful, forward-looking spirit.

Expressive down to the last detail, the Arona offers two contrasting roof colour options: Midnight Black and the **new Manhattan grey**.

REFINED INTERIOR, WITH MORE VALUE THAN EVER

Inside, both models step up in quality, design and connectivity—without losing their trademark sense of space and precision. The cabin introduces **new embossed textiles**, **refined materials**, a **darker headliner**, and **subtle, neutral accents** on the air vents, adding refinement to the interior. In the launch edition FR trim, **bucket seats** now come as **standard**, adding a sportier edge and enhanced comfort—offering the perfect balance between everyday usability and dynamic driving feel.

A **new black-finished greenhouse** sets the tone for a more refined and characterful cabin, complemented by **embossed textile for the seats**, **textile-finished door panels** and **soft-**

touch materials that add both personality and perceived quality. **New trims** and **textures** elevate the space.

The **steering wheel**, wrapped in **100% premium perforated leather**, delivers a tactile sense of precision and control from the moment you take the wheel. A black headliner adds to the immersive feel.

On the tech side, both models come with enhanced digital features, including the **new SEAT Sound system** with six speakers, a subwoofer, and a 300W amplifier for a high-fidelity audio experience. And with upgraded **15W wireless fast charging with refrigerated technology**, staying connected and powered up on the go is easier than ever.

ENGINES

Under the bonnet, the SEAT Ibiza and Arona continue to deliver the perfect balance of dynamism and efficiency. Powered by a range of **petrol engines** from 80PS (59kW) to 150PS (110kW), both models offer dynamic driving tailored to every need:

- **1.0 MPI 80PS** 3-cylinder engine with 5-speed manual gearbox (exclusive to Ibiza)
- **1.0 TSI 95PS** 3-cylinder engine with 5-speed manual gearbox
- **1.0 TSI 115PS** 3-cylinder engine with 6-speed manual or 7-speed DSG gearbox
- **1.5 TSI 150PS** 4-cylinder engine with 7-speed DSG gearbox

Designed, developed, and produced at SEAT's state-of-the-art Martorell facilities in Barcelona, both models will be launched in **January 2026**, leading SEAT's strategy built around **Product, Dealers, and Communications**. Under Product, the entire SEAT range will be renewed with **electrified options by 2028** - starting with mild-hybrid versions of the Ibiza and Arona in 2027, followed by a full hybrid powertrain for the SEAT Leon in 2028, and further updates to the Leon and Leon Sportstourer in 2029.

SEAT remains firmly committed to its dealers and customers, with more than 1,400 points of sale and 3,000 points of service worldwide, offering competitive service and maintenance, attractive insurance packages, and wide warranty coverage. Meanwhile, Communications is evolving with a revitalised visual identity and refreshed colour palette, keeping SEAT **vibrant, relevant, and closely connected** with its audience.

SEAT is one of Spain's most iconic and recognisable international brands. Founded 75 years ago, SEAT cars have been part of people's lives for generations. With eye-catching designs created in Barcelona, SEAT is the gateway to new clients for the Volkswagen Group.

The SEAT brand currently offers models from the most efficient, traditional combustion powertrains to mild and plug-in hybrids: the SEAT Ibiza, the brand's youthful car; SEAT Arona, a versatile urban SUV; the SEAT Leon and Leon Sportstourer, the spacious and sporty compact cars; the SEAT Ateca, the SUV with modern and striking design.
